PROSTATE CANCER**

FAQ

07 DEC 2021 UPDATE

1. Is the list of EOI questions available in PDF?

Yes. A copy of the EOI questions is now available for download under the 'Live Opportunities' section on <https://movember.com/about/funding>.

2. What is the overall budget of the program?

The overall budget for the program is up to AU \$7 million. For the avoidance of doubt, this funding is solely for the research program and does not include the establishment of the Global Cancer Real World Evidence Network. The funding may be used to fund one large working group or multiple smaller working groups with specific research focus.

3. Can I submit an EOI if I am not from countries where Movember actively fundraise in?

While the funding will mostly go to countries where Movember actively fundraise in (e.g. Australia, Canada, UK and USA), but will EOIs from other countries be accepted?

4. Does the EOI call for specific research proposals?

For the purpose of this EOI, we are not seeking individual research proposals. Instead, we are inviting interested individual / teams to join a working group to collaboratively design a program (or a series of projects) that can address the program objectives. With the aim to deliver tangible outcome in five years, individual / teams that are able to leverage existing resources or networks would be viewed favourably.

5. Should I submit an EOI as an individual researcher, or should I submit an EOI with a group of researchers that are keen to be involved as a team?

We are happy to receive EOI from both individuals as well as submission from collaborating teams. However, should you wish to submit as a team, it would make a stronger application if everyone on the team is aligned on the responses re: Questions 11 and 12 from the EOI question list. Also, if the team can nominate a team leader for all correspondence (i.e. submitting the EOI application) that would be much helpful.
